Zero to Hero(ish) with `git / github`

Denis Schluppeck, 2025-01-14

`markdown` for the win

- markdown syntax is simple

- any texteditor supports

- renders nicely on github (pages)

- version control (!!)

online materials + slides

`marp` has a command line tool, but also a neat little extensions for VSCode - a favourite code / text editor

```
# H1

## H2, etc.

<!-- html comments !-->

---
Three dashes for new slide
```

code

Code examples are easy (+ highlighted)

```
git add slides.md
git commit -m 'my message'
```

or `python`

```python
def hello_world():
    print("Hallo 🌍!")
```

and `r`

```r
library(dplyr)
d <- read_csv('tidy_data.csv')
```
